December 01 - The Vanishing Number

Problem Statement

Imagine a race event with N participants, each having a unique bib number from 1 to N . After the race, the event organizers collect the bib numbers of all participants who showed up. However, one participant didn't show up, and their bib number is missing. The task is to find out which bib number is missing in order to identify the participant who was absent.

Given an integer N and an array of size $N-1$ containing $N-1$ numbers between 1 to N . Find the number (between 1 to N), that is not present in the given array.
